G DATA
InternetSecurity 2008

G DATA InternetSecurity 2008 now offers even more comprehensive protection: With improved virus detection, an expanded firewall which, among other things, was optimized for games and less system load, the best in test as rated by the German "Stiftung Warentest" continues to expand its role as a quality leader.

What's NEW:

■ Award-winning virus detection **improved yet again**
■ **Quickest reaction** to new virus attacks
■ **Firewall** optimized for games: Autopilot allows transparent firewall protection during game sessions
■ **Spam filter** expanded by language blocker
■ Noticeably **less** system load

G DATA AntiVirus

• **DoubleScan:** best, award-winning virus detection
• **OutbreakShield:** Immediate protection against new viruses
• **New Heuristics** detects even more unknown viruses
• **Improved protection from viruses, worms, rootkits, spyware, dialers, Trojans, backdoors, and more.**
• **Virus blockers** for e-mails and instant messaging

G DATA Personal Firewall

• **Award-winning protection against attacks**
• New optimization for games: Switches automatically to Autopilot for transparent firewall protection
• **Easier to use, thanks to new rules**
• Four levels of security, or expert mode

G DATA AntiSpam

• Expanded by language blocker: detects and blocks ten different e-mail languages as desired

G DATA Child Protection

• **Individual user profiles,** blocks offensive contents and more
• **Keyword** filter for full text search (extensible)

G DATA WebFilter / DatenShredder

• **Trace eraser** and **data shredder**
• **Blocks** banners, pop-ups, Flash, Java / VB script, etc.

Updates / Upgrades

• Update detection every minute, software updates and upgrades are included for one year
